            Elliott — Documentation manager, plan manager
            Brenna — Database operations
            Stephen — Front End lead
            Abby — Back End lead   — Started setting up Github
    Brainstorming: repository
        — gym tracker application
        — public covid health dashboard
        — outbreak/case tracking dashboard
        — Dining hall population tracker
Planned next meeting time/date.

3/09 :
    Discussed using the Travel API as our project focus

    Planned out how we want our project to look:
        — Login/user database logs
        — Using User data, designate safe/danger countries
        — Profile page, safe/unsafe vacc countries, general info page

· updatable   · Map of safe   · Search bar and
· info put   countries   general info for each
  into database   · list of vaccines   country
                           needed   · covid info
                         · covid info
